On September 25, the Town of Mooresville Parks & Recreation Department was awarded agency accreditation by the Commission for Accreditation of Park and Recreation Agencies (CAPRA). This is an accomplishment that less than 5% of park & recreation departments in North Carolina can claim, and less than 3% of departments in the United States have earned.

This was a two year process the Department worked to receive this accreditation. Along the way our staff assembled evidence to show compliance with 151 standards in the following areas: Organization and Administration, Programs and Services Management, Financial Management, Facility and Land Use Management, Public Safety, Law Enforcement and Security, Risk Management, Human Resources, Planning and Evaluation and Assessment and Research.

The accreditation process included an agency self-assessment report which requires the Department to meet 37 fundamental standards, and at least 85% of the remaining standards. All evidence was submitted electronically, but if it had been printed, it would have required many large binders to hold the tremendous amount of information required for accreditation consideration.

Once the self-assessment was approved by the CAPRA Accreditation Board, the process progressed to an on-site visit by top peers from Texas, Georgia and Maryland. The final step was a formal panel review be-

fore the Accreditation Board at the National Recreation and Park Association Conference in New Orleans this past September. In total 10 Town staff members, two commissioners from the Town Board and one Deputy Town Manager were in attendance with high hopes for a positive outcome.

The Commission noted the department fully demonstrated its commitment to the park and recreation field by complying with a body of standards deemed essential to the quality of services delivered, and noted the professionalism of the Department's operational system. It stated the department accomplished best management practices in its delivery of programs and services to the Mooresville citizens.

CAPRA accreditation is valid for five years with a report submitted annually to the Accreditation Board. An in-house accreditation team made up of Parks & Recreation staff members from various operations of the department will meet once each month to review standards and ensure the Department continues to demonstrate compliance.

With this accreditation, the Town of Mooresville Parks & Recreation Department joins the Police Department and Fire-Rescue Department as accredited agencies within the Town. It's a group the Parks & Recreation staff are proud to be part of!

Reporting Illicit Discharges to Stormwater System

An illicit discharge is anything other than stormwater entering a storm drain or other part of the stormwater system. Common types of illicit discharges include pouring or allowing oil, other automotive chemicals, or paint into a storm drain, blowing grass clippings or leaves into a storm drain or roadside ditch intended for stormwater, and dumping trash into a storm drain.

Because these storm drains and roadside ditches connect directly to our local rivers, creeks and streams it is important to prevent illicit discharges from happening. These chemicals and waste materials can have negative environmental impacts on our local rivers, creeks and stream and wildlife.

To Prevent Illicit Discharges:

- Keep rags nearby when using oil and other automotive fluids to clean up any spills.
- Blow grass clippings back into your yard.
- Pile grass clippings, leaves and yard waste up above the curb wherever possible.
- Properly dispose of all garbage.
- Do not use water to wash spilled material into the storm drain.

If you do see an illicit discharge, or suspect an illicit discharge has occurred, please report it to the Stormwater Department at 704-663-7282.

Be Prepared with the Following Information:

- When did you see the possible illicit discharge?
- Where did you see the possible illicit discharge?
- What do you think the possible illicit discharge is?
- Is there a business involved?

Holiday Safety Tips

The holidays are a festive time with lots of parties and family visits. With these come lights and decorations, and a greater risk for fires. Mooresville Fire-Rescue reminds everyone to follow safety guidelines to ensure a safe and fire-safe holiday season:

- Be careful with holiday decorations. Choose decorations that are flame resistant or flame retardant.
- Keep lit candles away from decorations and other things that can burn. Battery operated candles are a safer alternative.
- Replace any string of lights with worn or broken chords or loose bulb connections. Connect no more than three strands of light sets to each other.
- Use clips, not nails, to hang lights so the chords do not get damaged.

- Test your smoke alarms and tell guests about your home fire escape plan.
- Stay in the kitchen when cooking. Prepare meals so they're ready BEFORE guests arrive.
- Keep children and pets away from lit candles.

Most holiday home fires are preventable. Nearly half of holiday decoration fires happen because decorations are placed too close to a heat source. Also, two out of every five home decoration fires are started by lit candles.

Blow out lit candles when you leave a room, leave your home or go to bed.

Turn off all light strings and decorations before leaving home or going to bed.

For more information, contact Mooresville Fire-Rescue at 704-664-1338.
